

GREEN SHAMPOO

FORMULA CODE: FT002

	COMMERCIAL NAME	INCI NAME	%
A1	WATER DEMIN./DEPUR.	AQUA	47,9
A2	GLYCEROL	GLYCERIN	5,0
A3	DISSOLVINE 47S	AQUA, TETRASODIUM GLUTAMATE DIACETATE	0,1
B1	OLIVOIL GLUTAMATE SURFAC-TANT	AQUA, SODIUM OLIVOYL GLUTAMATE, DISO-DIUM COCOYL GLUTAMATE	27,0
B2	PLANTACARE 1200 UP	LAURYL GLUCOSIDE, AQUA	7,0
B3	MIRANOL ULTRA C32	AQUA, SODIUM COCOAMPHOACETATE	13,0
C	KERASHAFT V	AQUA, HYDROLYZED VEGETABLE PROTEIN	1,0
D	PRESERVATIVES, PARFUM, SOLUBILIZER, CO-LORANT, pH REGULATOR	PRESERVATIVES, PARFUM, SOLUBILIZER, COLORANT, pH REGULATOR	AS NEEDED

Add A2 and A1 to A1, stirring until a clear solution is obtained.

Heat gently B2 and add it to B4, stirring until a clear solution is obtained.

Add B3 to the surfactants, mixing until a clear solution is obtained.

Add phase A to phase B, stirring until a clear solution is obtained.

Add C to the solution, stirring until clear.

Add preservatives, parfum, solubilizers and pH regulator as needed to set the pH between 5,90 and 6,10.

The final viscosity (1000 cPs) depends on the pH of the product, so the final pH should be chosen carefully.

The use of high quantities of perfume and solubilizers can decrease the viscosity of the product.

For better results in terms of limpidity, perfume and preservatives can be added in the surfactant phase (phase B) instead of adding them in the finished product.

100% ECOCERT APPROVED ingredients

Sulfate free shampoo frequent use

Hair keratin damage repair

Low eye irritation

OLIVOIL
GLUTAMATE
